

Student Club Event Ticketing & Budget Portal

SRN: PES1UG24CS378

NAME: Riya Saju Vithayathil

Requirements Table

Problem Statement #10: Student Club Event Ticketing & Budget Portal

Actors: Club Lead, Campus Admin

Functional Requirements (FR)

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall route event budget proposals through a multi-stage approval workflow (Faculty Coordinator → Finance Office → Dean).	High	Pass: Status transitions sequentially upon digital sign-off. Fail: Request reaches Dean without Finance Office sign-off.	Ensures financial accountability and prevents unauthorized budget release.
FR-002	Functional	The system shall allow a Club Lead to submit a new event proposal including event name, date, venue, and requested budget.	High	When a Club Lead submits a proposal with all required fields filled, the system creates a record with status "Pending Faculty Review" within 2 seconds.	Core entry point for the entire workflow; without this no downstream process can start.
FR-003	Functional	The system shall generate a unique, secure QR-code ticket for each attendee once an event proposal is fully approved.	High	Pass: Each generated QR code is cryptographically unique and cannot be reused for a different event. Fail: Two tickets share the same QR payload.	Prevents ticket duplication/fraud and enables reliable venue check-in.
FR-004	Functional	The system shall allow Campus Admin to scan a QR-code ticket at venue check-in and receive a valid/invalid confirmation.	High	When a valid ticket is scanned, the system displays "Access Granted" with attendee name within 1 second; invalid/duplicate scans display "Access Denied."	Enables real-time entry control and prevents unauthorized access.

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-005	Functional	The system shall allow a Club Lead to view the real-time approval status of their submitted budget proposal.	Medium	When a Club Lead opens "My Proposals," the current stage (Faculty/Finance/Dean/Approved/Rejected) is displayed and matches the backend status.	Improves transparency and reduces manual follow-up with admin staff.

Non - Functional Requirements (NFR)

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
NFR-001	Nonfunctional (Performance & Security)	The QR-code ticket scanner API shall validate entry authenticity in under 100ms at venue check-in points.	High	Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.	Ensures fast, non-blocking entry lines during high-attendance events.
NFR-002	Nonfunctional (Usability)	The event proposal submission form shall be completable by a first-time Club Lead user in under 5 minutes without external help.	Medium	A usability test with 5 first-time users shows an average completion time under 5 minutes with no more than 1 assistance request.	Reduces onboarding friction for new club leads with no technical background.

Use-Case Flow Specification

Use Case: UC-02 – Approve Budget Proposal

Actors: Faculty Coordinator, Finance Office, Dean

Supporting Actor: Club Lead

Preconditions

- Club Lead has successfully submitted an event proposal (UC-01) with status "Pending Faculty Review."
- The approver is logged into the portal with valid role-based access.

Postconditions

- Proposal status is updated to "Approved" or "Rejected."
- If approved, the event becomes eligible for QR-ticket generation (UC-04).
- If rejected, the Club Lead is notified of the rejection.

Main Success Scenario

1. Faculty Coordinator opens the "Pending Approvals" queue and selects a submitted event proposal.
2. System displays the proposal details: event name, date, venue, and requested budget.
3. Faculty Coordinator reviews the proposal and digitally signs off, approving it.
4. System updates the proposal status to "Pending Finance Review" and routes it to the Finance Office.
5. Finance Office reviews the budget breakdown and digitally signs off, approving it.
6. System updates the proposal status to "Pending Dean Approval" and routes it to the Dean.
7. Dean reviews the fully endorsed proposal and gives final digital sign-off.
8. System updates the proposal status to "Approved."
9. System makes the approved event eligible for QR-ticket generation (UC-04).
10. System notifies the Club Lead that the proposal has been approved.
11. Use case ends successfully.

Alternate Flow – Proposal Rejected

7a. Rejected at Any Approval Stage

- 7a1. If any approver (Faculty Coordinator, Finance Office, or Dean) rejects the proposal at their stage, the system immediately halts further routing.
- 7a2. System updates the proposal status to "Rejected."
- 7a3. System notifies the Club Lead of the rejection.
- 7a4. Club Lead may revise and resubmit the proposal, restarting the workflow from Step 1.
